Painting

### Technical Drawings

#### Armchair

#### Complete Cushioning

### Notes

Wood is a living material; therefore, it can have slight color and dimension changes. The presence of any non-homogeneous color shades is not to be considered a defect but a quality.

STRIPED GREY: it is a decorative multilaminar wood veneer, always finished with a transparent acrylic painting, which features exclusive patterns reproducing the natural characteristics of wood. We would like to remind you that, being a natural and living wooden material, it may present non-homogeneous colour shades, which are peculiarities of the material itself.

STONE OAK®: this wood owes its particular coloring to an entirely natural process. Because of this, some slabs may look more brown than others. Our commitment is to provide you a high-quality product; any differences in color should not be considered as defects.

For information on the compatibility of the collection's coverings with each product, please refer to the [compliance sheet](#) provided in the "Materials" section of the website.

For leather coverings the "Leather A" or "Leather B" Maintenance Kit is included with the product.
