EXTRA WALL | INDOOR - OUTDOOR

design Piero Lissoni

Modular elements of different dimensions, available for indoor and outdoor use.
Indoor version: frame in double-panelled poplar and pine. Suspension system with cross-woven elastic straps in coated rubber. Padding in differentiated density polyurethane foam. Cover in polyester fiber with needle treatment and resin fi nish, bonded to a polyamide velveteen backing. Fabric or leather upholstery. The fabric version only is fully removable with Velcro fastenings. All elements in leather have perimeter seams, and the upholstery is non-removable.

Outdoor version: frame in steel lacquered for outdoor for bases and in steel lacquered for outdoor and plywood for outdoor for backrests and armrests. For bases only, suspension system with cross-woven elastic straps in coated rubber and Stainless Steel hooks for outdoor.
Padding with open cell structure polyurethane foam, with draining fabric cover. Upholstery with outdoor fabrics only completely removable with Velcro fastenings. For both versions floor support provided by adjustable plastic feet. The various elements are joined together by means of hooks.
Seat depth: 68 - 94 - 120 - 134 - 146 cm.

Notes

All elements can be ordered 5 to 10 cm higher than standard.

On request can be ordered a spacer, to lift the elements of further 4 cm: for the indoor version only, through spacers (A) the to be screwed to the standard feet, meanwhile for the outdoor version by replacing the standard feet (h. 8 cm in total) with a foot with a height of 12 cm.

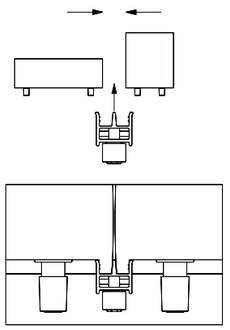
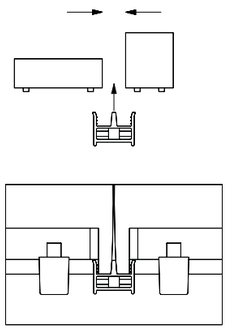
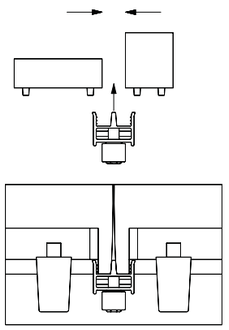
Hooks for assembly for indoor elements with feet and spacer



Hooks for assembly for outdoor elements with feet in height 8 cm



Hooks for assembly for outdoor elements with feet in height 12 cm



For the 146 cm armrests and backrests 146 cm and 172 cm in leather, there is always a central seam.

For the 146 cm base in fabric or leather there is always central seam; if combined with a 146 cm backrest, this will also have central seam.

For information on the compatibility of the collection's coverings with each product, please refer to the compliance sheet provided in the "Materials" section of the website.

For leather coverings the "Leather A" or "Leather B" Maintenance Kit is included with the product.

For the OUTDOOR version, especially after prolonged rainy or humidity periods, it is suggested to rotate the elements and/or to temporarily lift the seat/back/armrest cushions to allow a complete drying and to avoid accumulation of dirt and moisture, causing the formation of mold.
We recommend placing the product on terraces or verandas to guarantee its durability over the years.
It is recommended to use a "Protective Cover" to improve the longevity of the product. For further information about the dedicated maintenance, please refer to the technical sheet available in the "Materials" section on our website.
