

Scenografie Contemporanee **Living Divani @ Salvioni Milano Durini**

Living Divani transforms the **Salvioni Milano Durini** showroom into a narrative of contemporary living. **Scenografie Contemporanee** is an inspirational journey in which design becomes language and space turns into storytelling: each object coexists with the others, and each setting conveys a vision of everyday life reinterpreted with elegance and sensitivity.

At the entrance, **Extrasoft** sofa appears as a silent protagonist, accompanied by the iconic **Frog** armchairs. Above it, a large rice-paper lamp descends like a light presence, defining the intimate and poetic atmosphere of the installation. Designed to shape a living area that combines comfort and functionality, **Brasilia** table, illuminated by the **Ad-astra** pendant lights, engages in dialogue with the **Ouzo** easy chairs, creating a composition with a harmonious and unexpected rhythm. **Sailor** bookcase adds character to the wall, while the **Alvea** sideboard, completed by the **Paradigma** mirror with charcoal-dyed oak accessories, introduces a material note that enriches the scene, evoking everyday gestures with natural elegance. Clearly visible from the windows, the **Aero T** trolleys complete the setting and reaffirm its versatility, combining practicality and refinement.

The night area presents a preview of the 2026 novelties: **Greene Bed**, designed by **David Lopez Quincoces**, with its delicate curves, conveys a relaxed and effortless mood, accompanied by a pair of **Confident** armchairs that expand its domestic dimension and invite one to linger. The **Aero** bookcases highlight its structural elegance, accompanying the space with lightness. **Inari** console, with its architectural presence, introduces a small scenographic corner, flanked by a pair of **Kigi** coat hangers—accessories with an unconventional form that enhance the unique qualities of each material—and crowned by the **Galileo** mirror. In the niche dedicated to personal care, the **Pebble** vanity is paired with six photographs on the wall, composing a scene of intimate retreat. The images from the project **Soliloqui: Milano** by **Gianluca Vassallo** refer to the city of Milan that hosts the showroom and to its design culture.

Continuing along the presentation, the most recent proposals gather around the **Gala** sofa, accompanied by the **Kasumi** indoor armchairs and the **Moon Coffee Tables**, which articulate the space with full, well-balanced volumes. In the background, the **Off Cut** bookcases create a light and orderly backdrop, helping to add depth to the setting and define its character. The journey concludes with a setting suspended between art and design, where the **Lemni** armchair meets **Light with a table**, suggesting an intimate and reflective use of objects.

Scenografie Contemporanee invites design to be experienced as a daily and narrative practice: every space, every object and every light expresses Living Divani's ability to create dwelling, fluid and deeply emotional environments.

"The collaboration with Salvioni Milano Durini stems from a shared vision of the project as a cultural experience. With Scenografie Contemporanee we tell the story of measured and essential environments, where design engages in dialogue with space and with the dimension of everyday life."
