LIVING

D I V A N I

For the second time, **Extrasoft**, the modular seating system designed by **Piero Lissoni** and one of **Living Divani**'s bestseller collections, has been selected by **Louis Vuitton** for the presentation of **Pharrell Williams' Men Spring-Summer 2027 Collection**.

Unveiled at the **Cité Internationale Universitaire in Paris**, the show transformed surfing into a true philosophy of life. At the heart of this narrative stood a silver caravan, parked among the dunes as a mobile refuge and symbol of a nomadic existence shaped by the rhythm of the ocean. It is within this setting that **Extrasoft** finds its place, contributing to an environment where comfort meets a spirit of adventure, and domesticity blends seamlessly with the desire for exploration.

With its informal language of soft volumes, modularity and compositional freedom, **Extrasoft** naturally embodies the way of living imagined by **Pharrell Williams**. More than a furnishing element, it becomes an integral part of a scenario that explores new ways of living, moving and inhabiting the world.
