

MAY 2014

REPORT ON SALONE DEL MOBILE MILANO

Positive results at the recent edition of the Milan Furniture Fair. Living Divani has reaffirmed its reference role within the international design scenario, with a proposal born by the meeting of multiple creative flows.

The booth, with its sensual atmosphere where even nature was tamed, revoked a large, cosmopolitan home: ideal container of the new proposals by Piero Lissoni, Davide Lopez Quincoces, Mario Ferrarini and Victor Vasilev, combined with the projects of the new designers Massimo Mariani, Marco Guazzini, LucidiPevere and mist-o.

For the Milan Design Week, Living Divani was also starring in two locations in the heart of Milan's Brera district: the "Giardino Geometrico" installation with the outdoor collection in the open-air spaces of the Brera Botanical Garden and the new Brerastore showroom with the indoor day&night collection. Three different presentations that reaffirm the key role attained by the firm in the contemporary design world, and its ability to create increasingly complete and harmonious living spaces.
